

Value-Added Assemblies and Sub-Assemblies

Birk Manufacturing Provides Value-added Assemblies with:

- **Vulcanization or lamination to machined parts**
- **Integrated sensors, switches and cut-offs**
- **Wiring harness**
- **Electrical and thermal testing**
- **Flex circuit/heater integration**
- **Customer-specified connectors or components**
- **Vendor management**

Innovating to Support Many Industries

Birk supplies assemblies to leading manufacturers in various industries. Let Birk integrate your thermal solution into your assembly or sub-assembly to reduce vendor lead time while reducing your vendor list.

Providing Plug-And-Play Assemblies

Birk can reduce our customer's production time and costs by supplying assemblies that are complete and tested.

Custom Designs. Prototypes. Fast.

Birk specializes in "engineered solutions", not ordinary products you can get elsewhere. Our design team thrives on developing innovative approaches to complex problems. Our continuing implementation of Lean Processes allows us to deliver prototypes in days or weeks, where others quote months. Each thermal system is custom designed to meet the specific requirements of each integrated circuit under test.

What Can Birk Do For You?
